

SYSTEM DETAILS:

SIZE: 57.6 KW

MODULES: TRINA 400W

TECHNOLOGY:
HIGH EFFICIENCY
POLYCRYSTALLINE

INVERTERS:
CPS SCA50KTLDO/US-480

RACKING: FIXED TILT (25°)

MODELED PRODUCTION:
1450 KWH/KW

HISTORICAL PRODUCTION:
1500 KWH/KW

LITTLE ROCK - Delta Solar today announced the successful completion of a 56-kilowatt (9kW) solar array for Peoples Bank of Sheridan, which becomes one of the first community banks in Arkansas to be 100 percent powered by solar energy.

"Since 2017, Delta Solar has partnered with clients across Arkansas to generate highly predictable, long-term returns on their solar investment," said Bob East, Chairman, Delta Solar. "We are excited to have collaborated with Peoples Bank to design and build a system that meets 100 percent of their energy needs and provides significant cost savings to help better serve their customers and community."

Peoples Bank's solar array is expected to save the community bank more than \$243,000 in energy costs over the next 30 years. The system is designed to produce enough power to offset energy usage at the bank's Sheridan headquarters.

"Delta Solar's team provided us a personalized solar solution that made sense environmentally and economically," said Craig Manatt, President/CEO, Peoples Bank. "Our solar system is a win-win for the bank as we were able to significantly reduce our electricity costs while generating a strong return on our investment."

The solar system offsets more than \$750 of the bank's most recent electric bill, according to Manatt. "By comparison, if we had not invested in solar and that money would have earned only \$0.10 on the dollar."

PEOPLES BANK

Peoples Bank was formed in September of 2000. We are headquartered, owned, and operated in Sheridan, AR with branches in Sheridan and East End. Peoples Bank strives to be the model of community banking. We immerse ourselves in our local communities to enhance the customer experience while seeking to positively impact the lives we touch. It has been our mission to be the bank "Where People Come First!" Our experienced and highly trained staff is empowered to make fast, local decisions while offering the best bank products available. Learn more at PeoplesBankAr.com and connect with us on Facebook.

"Our solar system is a win-win for the bank as we were able to significantly reduce our electricity costs while generating a strong return on our investment"

- Craig Manatt - President / CEO, Peoples Bank

(L to R): Dakota Hedden (Loan Officer / Marketing Coordinator, Peoples Bank) and Craig Manatt (President / CEO, People's Bank)

ABOUT DELTA SOLAR

Equipped with the industry's leading solar experts, Delta Solar is Arkansas based, owned, and operated. Our team custom designs each and every system based on our client's energy needs in order to optimize energy production and return on investment. We source only the best materials from around the globe to ensure each system we build performs at the highest level possible for as long as possible. The founders of Delta Solar pride ourselves on creating jobs in the communities we serve and we believe that our clients are our greatest assets.
